

SUPER SEEDER

with Semi Champion Plus Rotavetor

One pass ultimate sowing solution

Comes with farmer's first choice Semi Champion Plus rotavetor

Latest Disc type design ensure best in class performance

Roller Drive given from upper jack shaft minimize straw choking issue

Your Ultimate Companion

**Don't Burn-Go Green,
Save Land-Save Environment**

Shaktiman Super Seeder is the tractor operated Ultimate One Pass Sowing Solution Machine Which remove the paddy stubbles and mix it with soil, prepares land, and simultaneously Sow seeds. Shaktiman Super seeder machine is the combination of rotavetor and seed drill. This machine is coming with India's No.1 Semi Champion Plus rotavetor with fitment of JLF type blades in it, which ensure proper mixing of residues with soil effectively.

Shaktiman Super seeder is an environment friendly and economical solution where farmers doesn't need to burn crop residues and are not required to perform multiple operations on the field before sowing, hence it saves land from nutrients loss, saves time and cost for farmers.

Advantages

- Crop residue management, Land preparation and Sowing operations possible in a single pass which saves time and cost compare to other methods
- Saves land from nutrients loss and facilitates organic manure in soil by faster decomposition of crop residues
- Make possible sowing of wheat crop just after the harvesting of paddy crop, which resulted in reduction of time gap between two crops
- Enhance aeration and water holding capacity of land
- Higher crop yield* compare to all other traditional sowing methods
